

NeighbourZone™

Noise Reduction Solutions

Now you can live on the
Quiet Side

- **Can you hear your neighbours arguing or just talking?**
- **Is their TV or home entertainment system too loud?**
- **Boral NeighbourZone™ may be the solution to your problem!**

If neighbour noise is affecting your quality of life, Boral NeighbourZone™ may help you to regain your privacy...or even your sanity!

Whether you live in an apartment, villa unit or town-house, chances are that your property was built to the minimum acoustic requirements of the Building Code which many people find to be inadequate.

After undertaking comprehensive research, Boral Plasterboard has developed NeighbourZone™ acoustic upgrade systems to address this wide spread problem.

NeighbourZone™ has been designed to halve the level of noise with a minimum loss of living space. Trained installers will select the NeighbourZone™ system that is best suited to your situation and will ensure that the system is installed correctly and with minimum inconvenience.

"I could hear my neighbours snoring and playing the guitar until we installed NeighbourZone™," said Gary Watson from Currumbin in Queensland.

"Now the snoring can't be heard at all and the guitar noise has been considerably reduced. NeighbourZone™ has definitely made a difference and added value to the property".

Matt Smith had NeighbourZone™ installed in his townhouse in Essendon, Victoria.

"Ever since we moved in we could hear voices and the answering machine in the adjacent unit. It got to a stage that we were thinking of selling the house. We are rapt by the huge improvement made by NeighbourZone™ and now the issue has largely been resolved," he said.

To find out more about NeighbourZone™ or to contact one of the trained NeighbourZone™ installers, please visit www.boral.com.au/neighbourzone, phone TecASSIST 1800 811 222 or fax/mail to us the attached coupon.
