DUST CONTROL CONTROLS DUST.

NEW and unique formula
**SHEETROCK® DUST CONTROL
JOINT COMPOUND** reduces
amount of respirable airborne
dust during sanding:

- Breathe in clearer air with less dust
- Cleaner work site
- Less time on the job

Other features include:

- Weighs up to 25% less than our conventional joint compounds
- Less shrinkage

As tested to NIOSH Method 0600, SHEETROCK® Dust Control produced respirable airborne dust at levels lower than current OSHA Permissible Exposure Limits, which are in turn lower than the PELs set by Safe Work Australia.
