

Lay-in Ceiling Systems

Plain

Perforated

The USG Boral Layin Ceiling system provides customised ceiling visual effects with multiple perforation patterns and panel height options. The Lay in ceiling panels can be easily installed or removed, offering access to the plenum.

FEATURES AND BENEFITS

- A sealed ceiling design with simple lay-in panels provide easy access to enclosed plenum
- Available in multiple panel heights and also option of squared and beveled edges
- Numerous perforation patterns to achieve a customised effect or a higher noise reduction
- Concealed suspension system offers a smooth appearance
- A wide range of colors and wood tones
- Individually replaceable panels
